

# APPROACH TO PEDIATRIC SEPSIS

DR RAYA Y.MUSSA

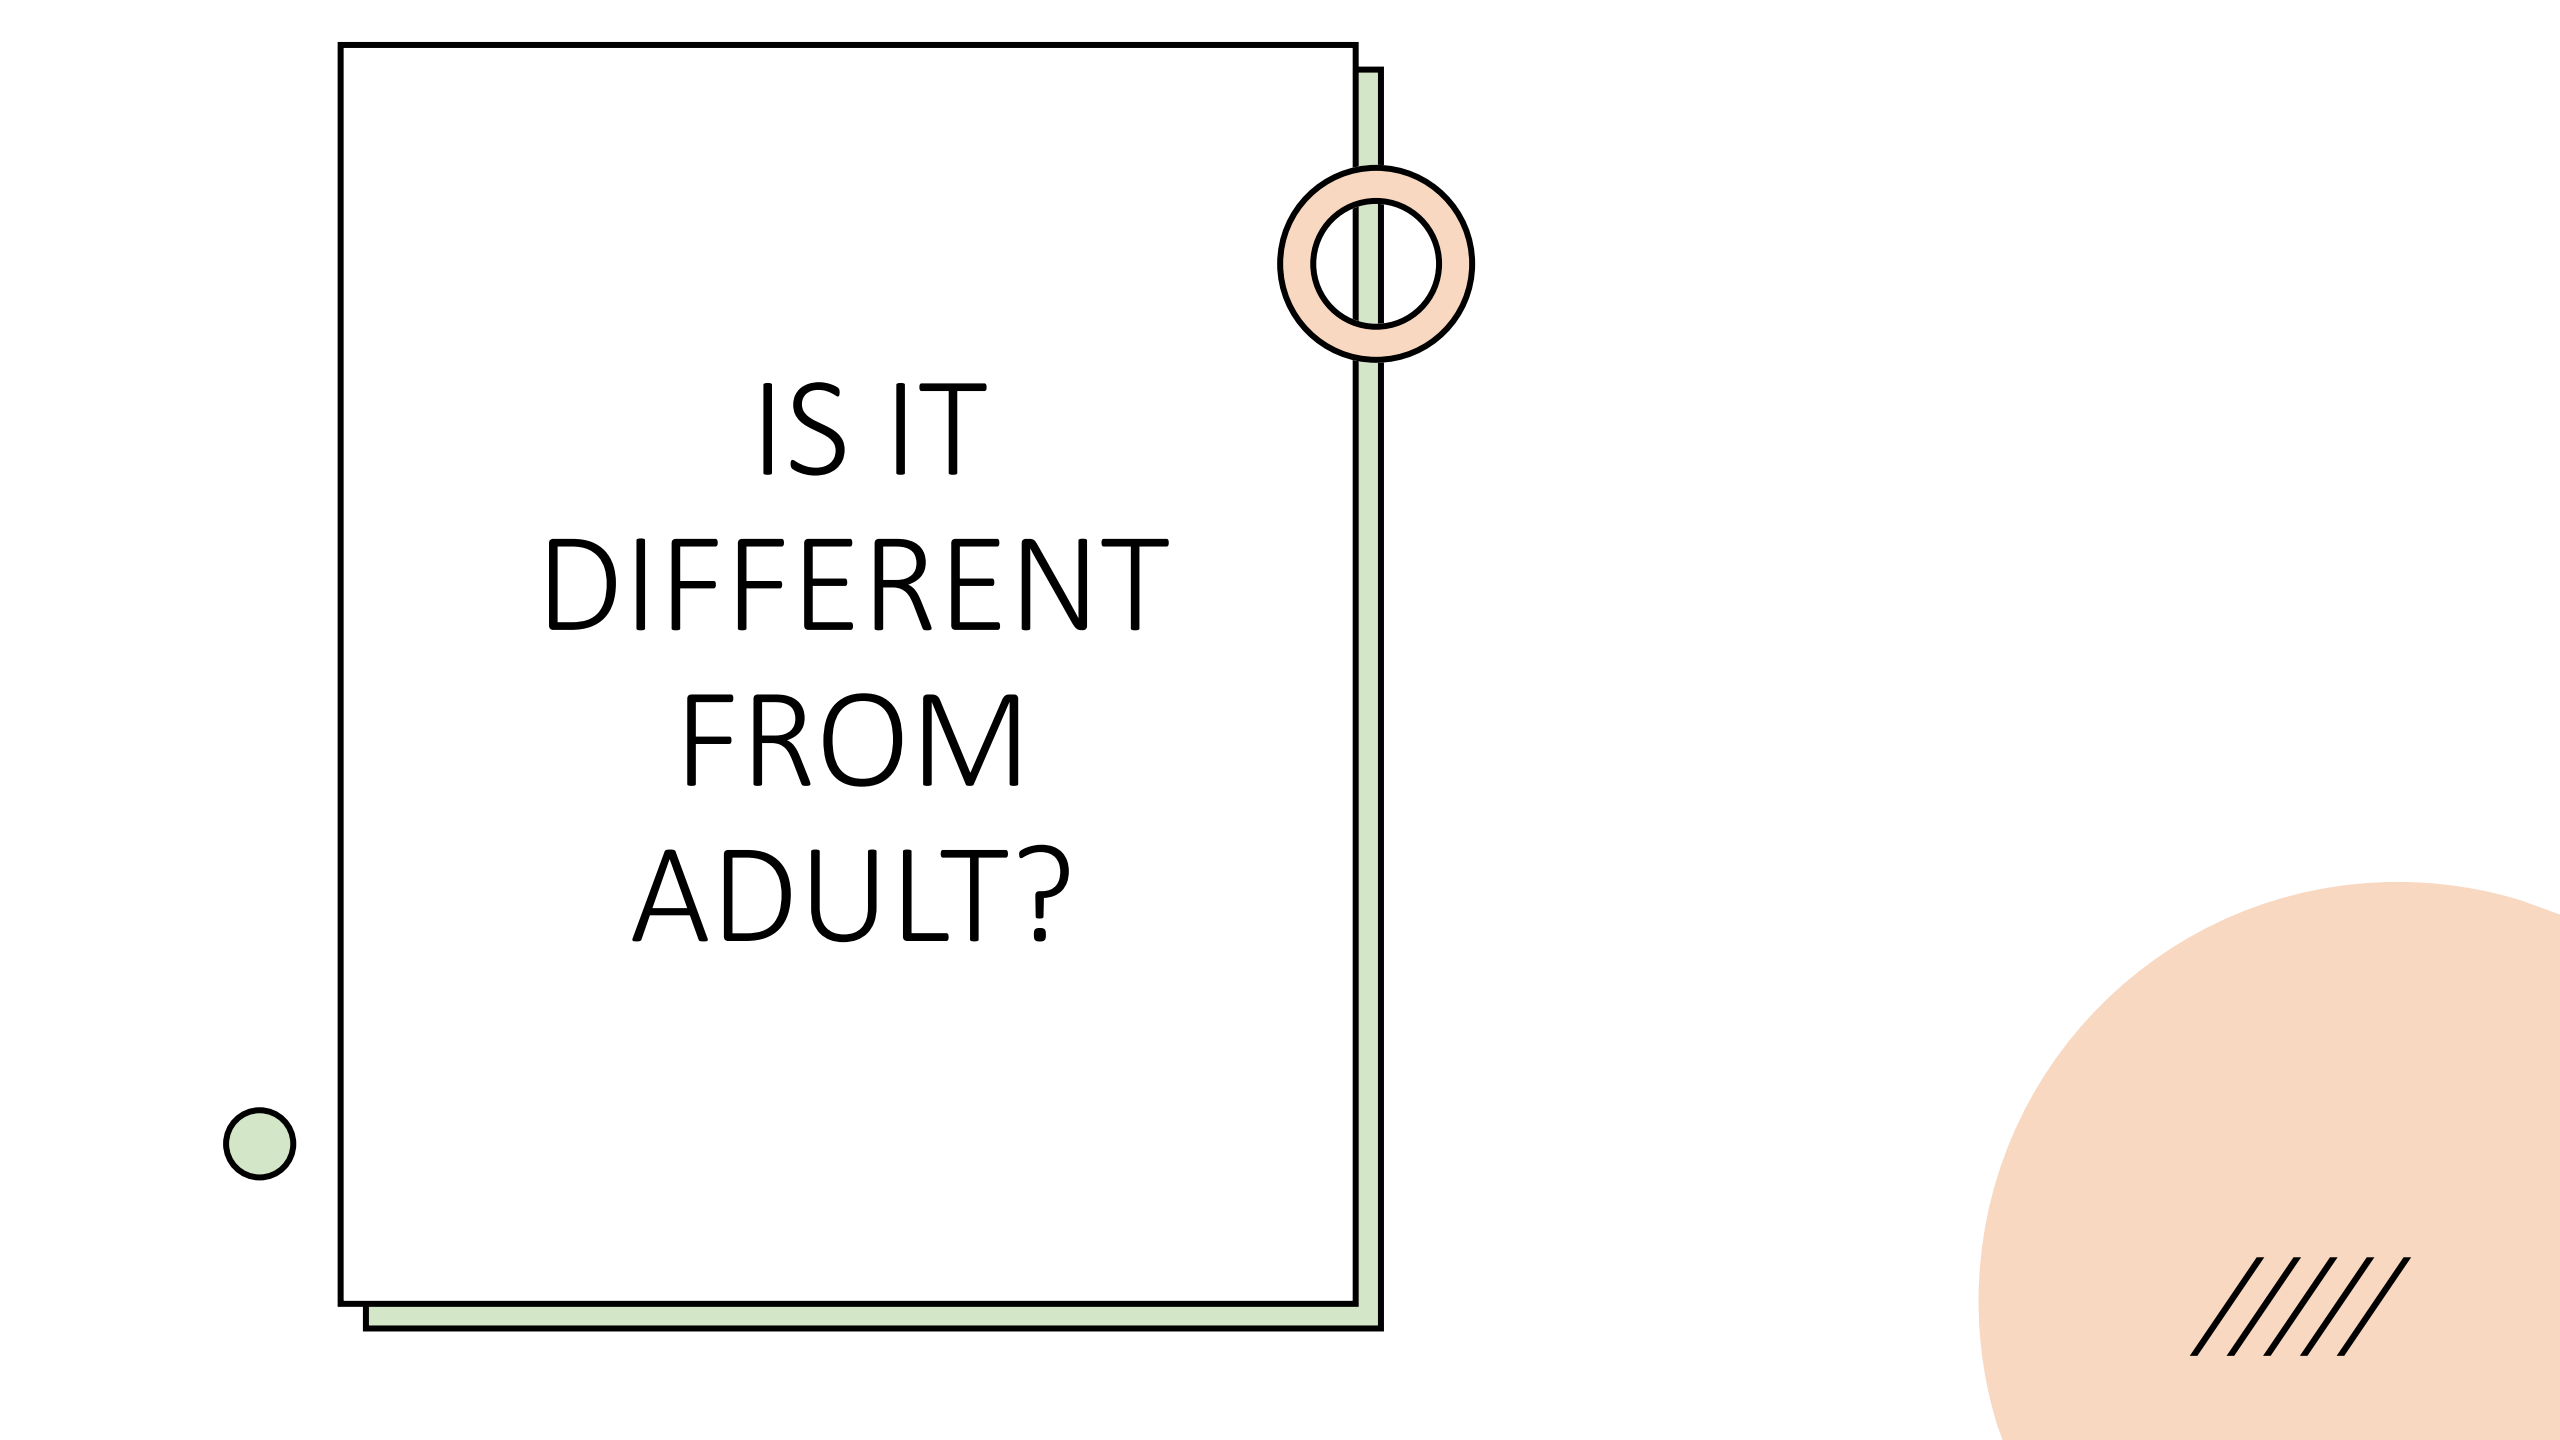

- 2years old patient presented at ED with history of high grade fever and difficult in breathing on examination temperature was 39.5C,SPO2 85% ,RR 45b/min, BP-90/60mmHg.

HOW WILL I  
KNOW IF THIS KID  
HAS SEPSIS?

IS IT  
DIFFERENT  
FROM  
ADULT?

WHAT  
SHOULD I DO?

THANK YOU
